Data Transfer

When changing systems losing historical data or to continue to operate two systems is not the ideal solution.

For this reason, we can provide data transfer services to assist to bring all historical data from your previous system into the Pyramid HR solution.

We require your existing data to be in a common file format (i.e. Excel, CSV, etc.) with headings to how the layout reads – this is also a good exercise to cleanse historical data also. Upon receipt of the file we will provide data conversion services to bring into our system.
